 Tagum City, Davao Del Norte, Philippines

Skills

- Languages: HTML5, CSS3, JS (ES6+), Java, PHP, SQL
- Tools: Android Studio, SQLite, MySQL, Git, Firebase
- Frameworks: Tailwind CSS, Bootstrap 5
- Other: UI/UX Design, EmailJS API, System Architecture

Language

- Bisaya
- Tagalog
- English

Education

(2023 - PRESENT)

**BACHELOR OF SCIENCE IN
COMPUTER SCIENCE**

TAGUM CITY COLLEGE OF SCIENCE AND
TECHNOLOGY FOUNDATION, INC.

Projects

**DEVELOPER | AI-POWERED PERSON
DETECTION SYSTEM (YOLO)**

- Developed and architected a high-performance computer vision system for real-time person detection, focusing on evaluating inference reliability and optimizing data-flow efficiency.

**SYSTEM DEVELOPER | WEB PORTFOLIOS
& INSTITUTIONAL PLATFORMS**

- Programmed responsive web systems featuring modular architectures and automated communication workflows to solve digital identity and user inquiry challenges.

Research Experience

**MOBILE-BASED ELECTRICAL DIGITAL
MODULE SYSTEM**

- Engineered an offline-accessible Android environment to replace physical modules and bridge educational accessibility gaps.
- Designed scalable data flow and local storage structures to ensure high-speed performance without internet dependency.
- Managed UI constraints and navigation roadmaps to streamline curriculum delivery and reduce reliance on manual distribution.
